KEY INFORMATION DOCUMENT

Crypto FX

PURPOSE

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, costs, risks and rewards of this product and to help you compare it with other products.

PRODUCT

The manufacturer of this product is ELANA Trading AD. Contact us on +359 2 81 000 95 or by e-mail at support@forex359.com for more information. ELANA Trading AD is under the supervision of the Bulgarian Financial Supervision Commission. This Key Information Document was published on 2 November 2026.

ALERT

You are about to trade a complex product offering exposure to highly volatile crypto-assets and involving margin trading. Rapid and substantial losses are possible. You do not acquire ownership of actual cryptocurrencies.

WHAT IS THIS PRODUCT?

TYPE

Crypto FX is a leveraged product traded on an unregulated market through the MetaTrader 4 (MT4) platform. Profit or loss depends directly on movements in the price of a cryptocurrency against its quote currency, for example Bitcoin against the US dollar (BTC/USD). Trading does not involve acquiring actual cryptocurrency. Visit ELANA Trading's website for the available instruments and trading conditions: https://www.forex359.com/en/trading-conditions/cryptofx/

OBJECTIVES

The objective of trading Crypto FX is to gain exposure to fluctuations in the price of an underlying cryptocurrency pair without actually owning the cryptocurrency. Your return depends on the performance (or price movement) of the underlying asset and the size of your position. This product is entered into for the purpose of speculation and is commonly traded on margin. Margin refers to the use of a small amount of capital to support an investment with a larger exposure. Please note that margin trading requires extra caution, because whilst you can realise large profits if the price moves in your favour, you risk substantial losses if the price moves against you.

INTENDED RETAIL INVESTOR

Trading in this product will not be appropriate for everyone. This product would commonly be used by persons who:

- want to gain short-term exposure to financial instruments/markets;
- are trading with money they can afford to lose;
- have a diversified investment and savings portfolio;
- have a high risk tolerance;

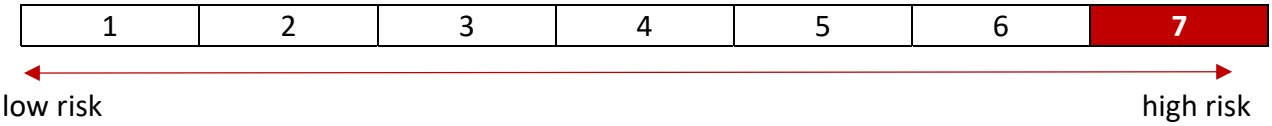
- understand the impact of and risks associated with margin trading.

TERM

This product has no fixed term or maturity date. You can open or close positions during trading hours. Open positions remaining at the end of the trading day are automatically rolled forward to the next available business day. Visit ELANA's website for further information about this product: https://www.forex359.com/en/trading-conditions/cryptofx/

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR



The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classifed this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level. Be aware of currency risk. You may receive payments in a different currency, so the fnal return you will get depends on the exchange rate between the currencies. This risk is not considered in the indicator shown above. In some circumstances you may be required to make further payments to pay for losses. Trading risks are magnifed by leverage – the total loss you may incur may signifcantly exceed the amount invested. Values may fluctuate signifcantly in times of high volatility or market/economic uncertainty; such swings are even more signifcant if your positions are leveraged and may also adversely affect your position. As a result, margin calls may be made quickly or frequently. In the event of default, ELANA shall seek to immediately terminate, cancel and close-out all of part of any outstanding positions, and any shortfall will be borne by you. Trade only after you have acknowledged and accepted the risks. You should carefully consider whether trading in leveraged products is appropriate for you.

PERFORMANCE SCENARIOS

There are a number of types of trading risk, including leverage risk, which you should be aware of before beginning to trade. Some but not all of the risks are listed below:

- Leverage risk;
- Risk of unlimited loss;
- Margin risk;
- Foreign exchange risk;
- Market risk;
- Unregulated market risk;
- Market disruption risk;
- Counterparty risk;
- Online trading platform and IT risk;
- Conflicts of interest.

EXAMPLE: Purchase of 0.01 BTC at an illustrative price of USD 80,000 per BTC. The notional position value is 0.01 × 80,000 = USD 800 (BTCUSD.fx). The initial account deposit is USD 500 and the position is held open for one day. The example excludes fees.

Scenario	Description	Profit/Loss	Yield %
Positive	+1% change in BTC/USD	profit 8 USD	+1.60%
Neutral	±0.1% change in BTC/USD	profit/loss 0.80 USD	±0.16%
Negative	-1% change in BTC/USD	loss 8 USD	-1.60%
Abnormal (force majeure)	-37.5% change in BTC/USD	loss 300 USD	-60.00% (risk of margin call and forced closure of the position)

WHAT HAPPENS IF ELANA TRADING IS UNABLE TO PAY OUT?

ELANA Trading AD is a member of Investor Compensation Fund in Bulgaria (http://sfund-bg.com/en) In the unlikely event that ELANA Trading AD is declared bankrupt, The Fund pays out compensation to every client up to 90% of the amount of the receivable, but not more than 20 000 EUR.

WHAT ARE THE COSTS?

Before you begin to trade Crypto FX, you should familiarise yourself with all commissions, fees and other charges that may apply. These charges will reduce your net profit or increase your losses. For more information please visit our website: https://www.forex359.com/en/trading-conditions/cryptofx/

BREAKDOWN OF POSSIBLE COSTS ASSOCIATED WITH CRYPTO FX		
One-off costs	Spread	The difference between the bid (sell) price and the offer (buy) price. The spread depends on various factors, including liquidity, volatility and trading hours.
Ongoing costs	Overnight rollover fee (SWAP)	Rollover charges for positions held open until the next trading day are determined in accordance with the conditions of the relevant Crypto FX instrument. Applicable swap rates (positive or negative, where relevant) can be found in the instrument specifications in the trading platform.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

An open Crypto FX position has no recommended holding period. You can enter and exit positions at any time during the trading hours of the relevant financial product, listed on our website.
