ALERT

You are about to purchase a product that is not simple and may be difficult to understand.

WHAT IS THIS PRODUCT?

TYPE

This is a 'Contract for Difference' ("CFD"). It allows you an indirect (also described as "synthetic") exposure to an underlying product or financial instrument (for example, to a security, commodity or index). You will have no direct interest in the underlying product/financial instrument. Accordingly, you can make gains or suffer losses as a result of price or value movements in relation to the underlying product or financial instrument to which you have the indirect exposure. Visit ELANA's website for further information in relation to the CFDs on Indices available <https://globaltrader.elana.net/en/en-tc/trading-conditions-cfd/>

OBJECTIVES

The objective of trading a CFD is to gain exposure to movements related to a financial product, benchmark or instrument without owning it. Your return depends on the size of the performance (or movement) of the underlying instrument and the size of your position. For example, if you believe the value of an Equity Index is going to increase, you would buy a number of CFDs ("going long"), with the intention to later sell them when they are at a higher value. The difference between the buy price and your subsequent sell price would equate to your profit, minus any relevant costs (detailed below). If you think the value of an index is going to decrease, you would sell a number of CFDs ("going short") at a specific value, expecting to later buy them back at a lower value than you previously agreed to sell them for. The difference between the sell price and the buy price would equate to your profit, minus any relevant costs (detailed below). However, if the underlying instrument moves in the opposite direction you will make a loss. This product is commonly traded on margin. Margin refers to the use of a small amount of capital to support an investment of a larger exposure. Please note that margin trading requires extra caution, because whilst you can realise

large profits if the price moves in your favour, you risk extensive losses if the price moves against you. More information about margin trading can be found here.

INTENDED RETAIL INVESTOR

Trading in this product will not be appropriate for everyone. This product would commonly be used by the following persons:

- who want to gain short term exposures to financial instruments/markets;
- who are using (trading with) money which they can afford to lose;
- who have a diversified investment and savings portfolio;
- who have a high risk tolerance; and understand the impact of and risks associated with margin trading.

TERM

CFDs on Indices are execution only products and generally therefore have no fixed or suggested maturity date. It is up to you to open and close your position, however your position will only be kept open to the extent that you have available margin. Specific information on each underlying investment option can be found at our web site <https://globaltrader.elana.net/en/en-tc/trading-conditions-cfd/>.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level. Be aware of currency risk. You may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. In some circumstances you may be required to make further payments to pay for losses. Trading risks are magnified by leverage – the total loss you may incur may significantly exceed the amount invested. Values may fluctuate significantly in times of high volatility or market/economic uncertainty; such swings are even more significant if your positions are leveraged and may also adversely affect your position. As a result, Margin calls may be made quickly or frequently, and in the event of default, your positions may be closed out and any shortfall will be borne by you. Trade only after you have acknowledged and accepted the risks. You should carefully consider whether trading in leveraged products is appropriate for you.

PERFORMANCE SCENARIOS

There are a number of types of trading risk, including leverage risk, which you should be aware of before beginning to trade. Some but not all of the risks are listed below:

- Leverage risk;
- Risk of unlimited loss;

- Margin risk;
- Foreign exchange risk;
- Market risk;
- Unregulated market risk;
- Market disruption risk;
- Counterparty risk;
- Online trading platform and IT risk.

EXAMPLE: Buy 1 US500.I(CFD on S&P 500 Index) at price 2885.00 USD. The initial account deposit is 200 USD and the position is hold for one day.

Scenario	Description	Profit/Loss	Yield %
Positive	+1% change of US500.I	profit 28.85 USD	+14.42%
Neutral	+/-0.1% change of US500.I	profit/loss 2.89 USD	+/-1.44%
Negative	-1% change of US500.I	loss 28.85 USD	-14.42%
Abnormal (force majeure)	-5% change of US500.I	loss 144.25 USD	-72.12% (margin call and a stop out is possible)

WHAT HAPPENS IF ELANA TRADING IS UNABLE TO PAY OUT?

ELANA Trading AD is a member of Investor Compensation Fund in Bulgaria (<http://sfund-bg.com/en>) In the unlikely event that ELANA Trading AD is declared bankrupt, The Fund pays out compensation to every client up to 90% of the amount of the receivable, but not more than 20 000 EUR.

WHAT ARE THE COSTS?

Before you begin to trade CFDs on Indices you should familiarise yourself with all one-off, ongoing, and incidental costs for which you will be liable. These charges will reduce any net profit or increase your losses. For more information please visit our website. <https://globaltrader.elana.net/bg/tc/trading-conditions-cfd/>.

THIS TABLE SHOWS THE DIFFERENT TYPES OF COSTS FOR CFDS ON EQUITY INDICES		
One-off costs	Spread	The difference between the Bid (Sell) and the Ask (Buy) price is called the spread.
	Currency Conversion Fee	The fee charged for converting realised profit/loss from the instrument currency to the account currency.
Ongoing costs	Overnight Financing	If you hold a long or a short position open after the market close, you will be subject to an Overnight Financing charge.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

CFDs on Indices has no recommended holding period. Provided that ELANA is open for trading you can enter and exit positions at any time.
